15:00 – 15:15	<i>Coffee to go to the awarded projects</i>
15:30 – 16:30	Project presentation
from 16:30 on	Departure

Invitation to the 8th in REVEAL conference

In November 2017 we founded the REVEAL association, which promotes innovative, competence-oriented training and learning arrangements and the validation of competences in informal and non-formal learning contexts. The association is based on a long-term cooperation among project teams from school, vocational, higher and adult education from 27 European Member States and partner countries.

Our community has been working on validation of informal learning for the last decade, has developed and introduced the unique LEVEL5 system in over 40 European projects with more than 2.000 learners in a vast variety of learning contexts and environments.

In the years 2018 and 2019 we have been working on the professionalisation of educators in the fields of blended competence oriented learning and validation. This implies the combination of all kinds of learning modalities including web-based learning technologies in a way which is modern and innovative but never just for the sake of the technology supported learning itself.

Each year we carry out a conference in which we exchange on current trends and innovative learning approaches – this year on Continuing Professional Development (CPD) and Blended Learning in new learning fields in adult and continuing education.

In the 2018 conference:

We will firstly focus on European CPD for Educators, namely KA1 courses.

As we are about to accomplish a first large scale European report on KA1 projects that are the main formats of EU-funded CPD for educators, we will present the results related to the wishes and demands of the participating professionals and their institutions and discuss the outcomes.

We will present the concept of a REVEAL platform which we have been developing for KA1 stakeholders, namely for:

- *Providers of continuing education and job shadowings*: They can present their courses and learning opportunities in attractive showrooms – in accordance

with goal- and quality-related criteria, and disseminate them throughout Europe.

- *European education institutions and their professionals*: They can select suitable learning and professionalisation services on the European platform, coordinate the competences that they themselves expect with their European development plans and document them in a special e-portfolio.
- *REVEAL online CPD space*: If needed, all stakeholders can gain access to learning technologies (e-portfolio, LMS and validation software) for professional use in blended learning arrangements which support competence-oriented learning and validation.

Secondly we will present new (blended) lifelong learning approaches in the field of cultural heritage in connection with an exhibition which currently runs in the watercastle of Alden Biesen.

Thirdly we will award competence oriented learning projects in the field of integration (storytelling for refugees and/or integration at the workplace).

Meeting Venue:

Castle of Alden Biesen
Kasteelstraat 6
3740 Bilzen
Belgium
